THANKGOD OBIEKEZIE

obiekeziethankgod@gmail.com | Data Analyst

Professional Summary

Data analyst with experience working across structured datasets using Excel, SQL, Power BI, and Python, focused on transforming raw data into clear insights that support business and operational decision. I also have a background in pharmacy, which has strengthened my ability to understand complex, interdependent systems, work with regulated and high-accuracy data, and apply structured analytical thinking to real-world problems.

Analytics Stack

- Excel/Google sheets - Data cleaning, formulas, pivot tables, charts
- SQL - Data querying, joins, aggregation
- Python (Pandas, Numpy, Matplotlib) - Data analysis and visualization
- Power BI - Dashboard development and KPI reporting
- Data Cleaning & Transformation
- Statistics – Descriptive analysis and basic inferential methods

Project Experience

Mental Health & Productivity Analysis *(SQL, Power BI)*
Performed end-to-end data analysis on employee mental health survey data, applying SQL for data transformation and DAX for advanced modeling, including custom correlation measures. Built an executive-level Power BI dashboard highlighting risk segmentation, productivity impact, and key behavioral insights.

Additional Projects:
Additional analytics and BI projects are currently in development and will be published periodically.

Portfolio:
thankgod-obiekezie.github.io

Education

Bachelor of Pharmacy (B.Pharm)
Final Year Project: Analyzed publicly available biological datasets from HPV patient studies using a bioinformatics pipeline; extracted and processed metadata in Excel to compute statistics, percentages, and create visualizations for pattern interpretation.

Independent Learning & Professional development

Completed self-directed training in data analytics through structured online coursework and applied project work.
